#### Memorandum

To: Opie Abeyta  
From: Ed Ginouves, Cedar City Field Office  
Subject: **Financial Security Request**

The Cedar City Field Office received a new notice, under the 43 CFR 3809 regulations, to conduct exploration activity on BLM lands managed through this office. This is a re-do of a notice was processed back in 2004 (UTU-81473, same operator) for essentially the same type of work. The operator let the notice expire, so now has to get it re-authorized. The notice will require the posting of a financial security to be in compliance with the regulations. The operator has adopted the DOGM fee schedule to cover the proposed project disturbances, all of which are on BLM-managed lands. Pertinent information for this operation is abstracted below. Call or E-mail me if you have any questions.

Proposed Action: The operator is again proposing trackhoe excavation within four previously disturbed (unreclaimed) areas (sites 1, 2, 3, 4) shown on the attached map. Access to each site will be by existing roads and trails. Excavation will be intermittent and possibly ongoing for several years. At the conclusion of the sampling activity, the excavation would be backfilled with rock rubble /soil mixture and seeded.
